

EVERROOF PRIMER SP10

ACRYLIC EMULSION PRIMER

TECHNICAL DATA SHEET

DESCRIPTION:

EVERROOF PRIMER SP10 is a waterborne modified acrylic neoprene asphalt primer specifically designed to provide maximum adhesion of polyurethane foam and coatings to various construction surfaces. When directly applied to polyurethane foam it provides short-term protection from the elements and an excellent surface for bonding of additional urethane foam or coatings.

EVERROOF PRIMER SP10 may be applied to BUR roofing, concrete, plywood and some metallic surfaces. Substrates to receive primer must be clean, dry and free of any foreign material such as grease, oil, water, dirt, etc. It is fast-drying and has little or no smell associated with its application.

FEATURES: (if used as directed)

- Odorless
- Nonflammable
- Nonhazardous
- Minimum Overspray
- Optimum Adhesion Characteristics

APPLICATION: **EVERROOF PRIMER SP10** should be applied at a rate of 1/4 gallon per 100 square feet. **NOTE:** Application rates will vary depending on substrates. It can be applied with airless spray equipment such as Graco 30:1. The primer must be thoroughly mixed prior to application. Cleanup can be accomplished with either water or mineral spirits.

COMPATABILITY: **EVERROOF PRIMER SP10** is compatible with Everroof foam and most coatings. For information regarding coatings that are not specified in this data sheet, please contact Everroof.

PACKAGING / SHIPPING:

- 5 gallon pails and 55 gallon drums
- Approximate Shipping Weight – 10 lbs. / gallon
- Freight Classification – paint, non-hazardous

Technical Data	
Application Method:	Designed for Airless or conventional spray equipment
Minimum Temperature:	38°F
Thinning:	Not Required
Dry Time:	30 Minutes @ 77°F, 50% R.H., 2 mils thickness *
Recoat Time:	1 hour @ 77°F, 50% R.H., 2 mils thickness *
Clean-Up Solvent:	Water or Mineral Spirits

Note: The primer should be thoroughly mixed just before application, and applied to a clean, dry surface.

* Dry time and recoat time will vary depending on temperature and relative humidity.

Typical Properties	
Solids by Weight (mixed):	65%
Solids by Volume (mixed):	56%
Elongation:	>100%
Service Temperature:	200°F

Technical Specifications	
Theoretical Coverage:	400 sq. ft. / gallon
Recommended Thickness:	1/4 gal. per 100 sq. ft.
Number of Coats:	One
Color:	Black

DISCLAIMER

Please read all information in the general guidelines, technical data sheets, application guide and material safety data sheets (MSDS) before applying material. Published technical data and instructions are subject to change without notice. Contact your local Everroof representative or visit our website for current technical data and instructions.

All guidelines, recommendations, statements, and technical data contained herein are based on information and tests we believe to be reliable and correct, but accuracy and completeness of said tests are not guaranteed and are not to be construed as a warranty, either expressed or implied. It is the user's responsibility to satisfy himself, by his own information and tests, to determine suitability of the product for his own intended use, application and job situation and user assumes all risk and liability resulting from his own use of the product. We do not suggest or guarantee that any hazards listed herein are the only ones that may exist.
